

Carbon Reduction Plan

Commitment to achieving net zero

TotalEnergies Charging Solutions UK Limited is committed to achieving net zero emissions by 2030.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

| Baseline year: 2024 | |
|---|----------------------------|
| Additional details relating to the baseline emissions calculations: | |
| No prior Scope 3 reporting | |
| Baseline year emissions: | |
| Emissions | Total (tCO ₂ e) |
| Scope 1+2 | 17.69 |
| Scope 3 (included sources) | 23.02 |
| Total emissions | 40.71 |
| Av. # of Full Time Employees (FTE) | 35 |
| Tonnes of CO ₂ e per FTE | 1.16 |

Current emissions reporting

| Reporting year: 2025 (H1) | |
|-------------------------------------|----------------------------|
| Emissions | TOTAL (tCO ₂ e) |
| Scope 1+2 | 10.77 |
| Scope 3 (included sources) | 24.58 |
| Total emissions | 35.35 |
| Av. # of Full Time Employees (FTE) | 39 |
| Tonnes of CO ₂ e per FTE | 0.9 |

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

From 2026 onwards we would look to reduce the baseline by 10% in 2027.

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

2026 - 10% reduction

2027 - 5% reduction

2028 - 5% reduction

This is a reduction of 20%. We would look to offset the remaining.

Due to the increase in activity of our business and deployment of infrastructure across the UK our 2025 emissions will increase from our baseline emissions reporting and individuals carbon footprint will also rise due to increased travel and activities. We anticipate that a representative baseline will be available in 2025. However, despite the increased activity, our company will seek to limit the average tCO2e per employee through suitable accredited carbon reduction projects.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been implemented but as we have not currently got a baseline their impact is not known.

- Educating staff with Carbon Literacy training
- Encouragement to use low carbon forms of transport
- Promotion of good energy management whilst working from both the office and at home
- Migration of entire company car fleet to BEV
- Implementation of waste reduction and recycling programmes
- Procurement of electricity through a renewable electricity tariff

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Further education on Carbon Literacy for all staff members
- Expansion of waste reduction and recycling programmes
- Further promotion of good energy management and reduction of European travel

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
